

Global Trade Application Suite

Plan, optimize, and execute global trade in one place

Global organizations move goods all over the world. The most successful develop the agility to respond rapidly to unpredictable regulatory environments. By managing all aspects of global trade on a single platform and relying on the world's most comprehensive and current database of trade content, companies can centralize and standardize their processes while decreasing the risk of cross-border compliance issues. Enterprises can also cut costs by leveraging automation to manage trade agreements and other duty savings programs.

Key to Handling Trade Complexities and Rising Costs

Global trade is becoming increasingly complex and costly to manage. Companies now source from and sell within more jurisdictions than ever, and trade regulations fluctuate with greater frequency. Meanwhile, penalties for non-compliance are growing more severe. With the right platform, organizations can navigate these challenges — and use trade agreements and duty management programs to improve margins — for new growth and competitive advantage. E2open's suite of Global Trade applications helps companies achieve their goals by providing a consolidated supply chain platform to efficiently plan, execute, and administer global trade.

Unmatched Trade Data and a Powerful Network

E2open's scalable platform is backed by the world's most comprehensive database of regulations and business rules, covering 98% of world trade. The system automatically applies these rules to all cross-border transactions, mitigating non-compliance risks such as border clearance delays, fines, loss of trade privileges, and criminal liability. Organizations also gain the ability to administer complex programs that minimize duty costs. In addition, companies can speed imports and exports by accessing the connections in e2open's powerful network of global trade partners.

“We’ve simplified our shipment process, automated documentation and trade party screening, and gained regulatory and financial control over our international shipments. Currently, 90% of all our shipments are pre-cleared.”

One Place to Manage Global Trade

A unified system enables companies to accurately identify ways to reduce duty costs and expedite cross-border movements while enhancing compliance across all jurisdictions. Powerful collaboration tools allow supply chain partners to seamlessly exchange information. Automated validation and plausibility checks verify all transactions against up-to-date trade rules, ensuring regulatory compliance. E2open delivers everything companies need to efficiently manage global trade in one place and optimize their cost savings.

Applications

Due Diligence Screening

Maintain compliance across global operations by efficiently screening customers, suppliers, and other partners against sanctions, denied party lists, and dual-use restrictions.

Export Management

Automate export compliance, including country controls, restricted party screening, license determination and tracking, and document generation for efficient processing.

Import Management

Speed imports with full compliance by leveraging complete documentation for every inbound shipment and collaborating with suppliers, brokers, carriers, and forwarders.

Duty Management

Optimize duty savings by automating the management of deferrals and refunds. Fully leverage EU Customs Warehousing, U.S. Foreign-Trade Zones (FTZs), and Duty Drawback programs.

Customs Filing

Confidently file with customs agencies to facilitate cross-border operations and reduce delays. Save time by accessing detailed country-specific compliance rules.

Global Knowledge®

Enhance compliance with access to the world’s most comprehensive, current, and accurate data on regulatory controls, restricted parties, classifications, and landed costs.

About e2open

E2open is the connected supply chain software platform that enables the world’s largest companies to transform the way they make, move, and sell goods and services. With the broadest cloud-native global platform purpose-built for modern supply chains, e2open connects more than 400,000 manufacturing, logistics, channel, and distribution partners as one multi-enterprise network tracking over 12 billion transactions annually. Our SaaS platform anticipates disruptions and opportunities to help companies improve efficiency, reduce waste, and operate sustainably. Moving as one.™
